Texas Is a Two-Tax State: Property and Sales Taxes

Texas’ Regressive Tax System

Highest-Income Texas Households Pay Less Than Their Fair Share of State and Local Taxes

The bottom four-fifths of Texas households contribute more to the support of public services than their share of personal income, while the one-fifth of households with incomes over $146,699 pay a smaller share.

Texas Households with the Lowest Income Pay the Highest Percentage in Taxes

Another way to look at the fairness of Texas’ tax system is to examine the share of family income that goes to paying for public services.

The one-fifth of households with the lowest income pay four times as much in taxes, as a share of their income, as do the one-fifth of households with the highest incomes.

State/Local Taxes as a Share of Personal Income

We believe in a Texas that offers everyone the chance to compete and succeed in life.

We envision a Texas where everyone is healthy, well-educated, and financially secure.
