Get the Facts on Paid Sick Days

For the future prosperity of all Texans, it’s time for Texas lawmakers to support the backbone of the Texas economy by supporting working families. Across the country, cities and states are expanding access to paid sick days so that workers don’t have to choose between economic security and taking time off work when ill. Approximately 4.3 million Texas workers – or 40 percent of the total workforce – lack access to paid sick leave. Even in our environment of low-unemployment, the market has failed to increase access to jobs that provide this basic protection.

Paid sick days promote healthier communities, support our economy’s lowest paid workers, and build a stronger, more competitive economy.

### Across Texas Workers Lack Access to Paid Sick Days

**FACT: Paid sick days make our communities healthier.**

Paid sick days increase the rate of preventive medical care use, such as regular checkups with a primary care physician or annual flu shots. Workers with access to paid sick days are 29 percent more likely to stay home when they have the flu than those without. Workers without access to paid sick time are almost two times more likely to forgo care for a family member and three times more likely to forgo treatment for themselves.

National paid sick days policy could save over $517 million annually in hospital emergency department costs to public health insurance programs such as Medicare and Medicaid.

**FACT: Paid sick days help keep kids healthy.**

A lack of paid sick days harms Texas children. In Texas, 60 percent of children 12 and younger live in households where all available parents are in the labor force. Parents without paid sick days are twice as likely to send their child to school sick. When sick children go to school, they’re more likely to spread illnesses to other students and their families and less likely to succeed in school.

**FACT: Paid sick days are critical for victims of domestic abuse and sexual assault.**

Survivors of domestic violence are at an increased risk of harm during and shortly after separating from an abusive partner. Sexual assault victims should have rape kits completed within 72 hours to collect evidence. Both Austin and San Antonio ordinances provide for employees to use paid sick leave to seek medical attention, seek relocation, obtain services from a victim services organization, or other needs related to an incident of victimization from domestic abuse, sexual assault, or stalking involving the employee or employee’s family member.
FACT: Paid sick days improve the economic security of working families.
Workers across the country without access to paid sick leave are three times more likely to face financial instability. For the average worker without paid sick days, three days of lost pay is equivalent to their entire monthly grocery budget. Additionally, people with no paid sick leave benefits are more likely to experience food insecurity and require cash assistance, child care subsidies, and Supplemental Nutrition Assistance Programs (SNAP) benefits.

FACT: Paid sick days create stronger, safer business environments.
Texas businesses depend on a healthy workforce to succeed. Nationally, working sick Americans cost employers $160 billion annually from decreased productivity and unnecessarily extended illnesses. Paid sick days reduce the likelihood of workplace injuries by 28 percent, saving companies money on health care costs and protecting workers.

Additionally, paid sick leave helps keep customers safe. A report on the Houston-area restaurant industry found that 74 percent of workers reported preparing and handling food while sick.

FACT: Lack of paid sick days hurts low-wage, Hispanic, and part-time workers the most.
No hard-working Texan – no matter their race, ethnicity, background, income, or occupation – should have to choose between their health and their job. Unfortunately, there are large disparities in access to paid sick days, with Hispanic, low-income, and part-time Texas workers least likely to earn paid sick days at work.

The inability of local elected leaders to raise wages makes it even more important for them to enact other standards like paid sick time so that low-wage workers are not forced to choose between caring for a sick loved one and losing a day’s wages.
